AI4S: Academic and Industrial Popular Lecture Series

Talk -01

On

Cyber Security

by

Dr. Dharendra Pandey, Associate Professor, Department of IT, Baba Saheb Bhimrao Ambedkar Central University,
Lucknow (U.P.)

Date: 12.04.2023

The Department has started AI4S (Academic and Industrial Popular Lecture Series) academic and industrial lecture series from April 1st 2023. The objective of this series is to make aware to the students about latest technological development in IT industry. So that students will be aware about technologies which are being used in industry and accordingly they can plan for their career.

The First talk on “Cyber Security” under the special lecture series of AI4S was organized by Department of Computer Science and Application on 12th April 2023. The talk was delivered by Dr. Dharendra Pandey, Associate Professor, Department of IT, Baba Saheb Bhimrao Ambedkar Central University, Lucknow (U.P.). The program started with the welcome and introductory speech by Dr. H.S. Hota, HOD, Department of Computer Science and Application. He explained the need and objective of this lecture series.

Dr. Dharendra Pandey started his lecture with basic concept of networking. He discussed about various cyber-attacks and hacking. He also discussed about 2-step verification, strong password and cybercrime reporting. He concluded the session by sharing some tips for safe internet banking and protecting devices from hackers.

In the lecture session, the students had an intensive interaction with the expert and all the queries were answered by expert. The lecture was very fruitful in the sense that every student got a clear idea regarding the cyber security. Feedback was given by the students also.

The program was concluded by vote of thanks by Mr. Jeetendra Gupta, Assistant Professor, Department of Computer Science and Application. He expressed special gratitude to Dr. Dharendra Pandey for his informative and useful lecture. He also expressed gratitude to Dr. H.S. Hota for his constant encouragement and support in conducting this type of program. Sixty students from B.Sc. (hon's) Computer Science have actively participated in the lecture series.
